## **SCA Ortviken chooses Eurocon Analyzer and PulpEye for the new pulp line**

Eurocon Analyzer has received the order to supply three PulpEye pulp analyzers to SCA Ortviken's new TMP line.

"It feels good that SCA gave us the trust in this project, a trust that we will manage to meet and exceed their expectations. This order is also the biggest single order so far for Eurocon Analyzer" tells Öjvind Sundvall.

PulpEye is based on latest technologies and automatically carries out accurate measurements at high frequency, which is necessary to monitor and control important quality parameters in the production line. This results in lower production cost and more even quality.
