Update regarding comparative feed study

Quad County Corn Processors has informed Taurus that the production of Distillers Grains (the feed product) made with XyloFerm® and unmodified yeast, respectively, is completed and that the samples have been sent to an independent laboratory for analysis. The results from the analysis will be reviewed by Taurus' expert panel as soon as possible.

About Taurus Energy AB

Taurus Energy AB is a research and development company, which aims to commercialize its extensive research and development program in the field of ethanol production. Since 2006, the company's mission has been to license energy producers to use the methods developed by the company on a global market. Taurus Energy holds over 10 patent families, which have been developed with the help of around 20 internationally recognized scientists. Taurus Energy is listed on the Aktietorget equities market.
